1 hold sculpture on the wall and mark the upper bracket on the backside

2 use template to mark the hole for drilling

3 drill the hole and use dowel

4 screw in the screw so that 1 cm are out of the wall

5 mount sculpture with nut screw and wrench from the side (**before !** just hang the sculpture on the one screw and level the sculpture and then mark the second bottom bracket like before with the upper one (repeat step 1 – 5)

6 (6mm french screw and 6mm nut screws)

(Use the same method for the small wall work)
